Made from 100% Virgin material for stability and real wood visuals.
- 3 4.5 MM COMPOSITE CORE**
Waterproof construction with a Uniclic Locking System.
- 4 ATTACHED UNDERLAYMENT**
IXPE closed cell cushion for superior sound absorption. Conforms to sub-floor imperfections.

Flex Core Distinctions

Flex Core Distinctions is a perfect choice in the new generation of truly waterproof flooring. These products are constructed with a high-density 100% waterproof core that will not absorb moisture and will not mold or mildew. The attached underlayment provides an exceptionally quiet floor, with comfort underfoot and an enhanced warmth.

The Distinctions Collection features 9" wide by 60" long planks to replicate the wide width long plank trend in wood flooring. These floors are crafted with an Embossed In Register surface (EIR) that captures the beauty of the wood grain, knots and other natural textures of real wood floors. This process combined with the micro-beveled edge brings the beauty and visuals of real wood to your home in a waterproof form.

Our floors are naturally hygienic and easy to clean making them family friendly and a perfect choice for kids and pets. Distinctions provides a genuine wood look that withstands the demands of everyday living.
